### 1. Novelty (PCT Article 33(2))

Documents D2 (compounds 4a and 4b), D3 (page 1352,  
compounds 1, 2 and 7) and D4 (page 1968, formulae 1

and 2) disclose lactone compounds that have been excluded from claim 1.

Structurally, the compounds of D1 are less relevant than those of documents D2-D4.

The subject matter of claims 1-3 fulfils the requirements of PCT Article 33(2).

The method of claims 4-7 does not refer back to the compounds of claim 1 and, as a result, the disclaimers are not included in this claim. However, the claimed method differs from those in the prior art and the novelty thereof can, therefore, be recognised.

Claims 8-11 are now worded so that they relate to a compound for use as an antioxidant agent (pharmaceutical properties). Said compound has the same formula as the one in claim 1 but the disclaimers of claim 1 are not included. Novelty can be recognised over documents D2-D4. Indeed, in the field of medical uses, such a formulation appears to be acceptable.

As a result, the subject matter of claims 1-17 can be considered to be novel and, therefore, fulfils the requirements of PCT Article 33(2).

3. **Inventive step** (PCT Article 33(3))

It follows that the problem that the present invention is intended to solve can be considered to be that of providing novel compounds, which have antioxidant properties and can be used for

therapeutic/cosmetic purposes.

None of the prior art documents suggests that the disclosed compounds have antioxidant properties.

The subject matter of claims 1-17 fulfils the requirements of PCT Article 33(3).

4. Contrary to the requirements of PCT Rule 5.1(a)(ii), the description does not indicate the relevant prior art disclosed in documents D2-D4, nor does it cite said documents.
